

# The perfect way to finish your boiler installations.

## **n-case** boiler pipe casing - Simple, quick and cost effective

Almost any boiler installation can be improved by concealing gas and central heating pipes with our pre-formed and pre-finished boiler pipe work casings.

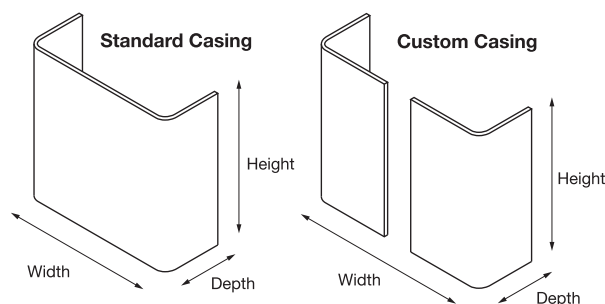

With a wide range of 'Standard' one-piece casings and 'Custom' two-piece solutions, including jointed and 'factory pre-made' options, they not only provide enormous versatility and choice, but can also be fitted in around half the time of traditional site made alternatives.

Ideal for ongoing refurbishment programmes as well as new boiler and central heating installations, the casings are self-supporting, so can be free standing or secured using mechanical fixings or mastic adhesives, which enables easy removal for routine servicing or maintenance.

All n-case boiler pipe-work casings are pre-finished in hard wearing white melamine, making them easy to wipe clean with no need to paint. An integral document wallet is also available for easy storage of boiler operating and maintenance information.

- Cost effective method of covering unsightly pipe work
- Simple and quick to fit – plus a 2 year guarantee
- Wide range of sizes in single and two-piece construction
- Ideal for use above or below the boiler
- Reduces risk of burns on hot water pipes
- Melamine finish – no need to paint and easy to clean
- Easy access for routine servicing & maintenance

Don't just box it **n-case** it.

# Don't waste your money with site made pipe boxing.

## Half the time, half the cost with **n-case** pipe boxing.

The n-case system of one piece pre-formed and pre-finished pipe boxing helps you avoid the time consuming and costly process of fabricating boxing on site, making things quicker, easier, more cost effective and attractive.

Available in a wide range of sizes, our n-case Riva and Versa pipe boxing is already used in countless private and public sector projects from high volume social housing refurbishment, to new homes contracts with major house builders, including affordable housing initiatives through to prestige apartments.

Whether you're boxing in central heating or wastewater pipe work, our extensive range of pipe boxing provides a simple, quick and cost effective solution that saves you time and money on new installations or as part of ongoing RMI programmes to meet 'Decent Homes' standards.

A range of accessories is also available within the n-case system to keep things simple and quick on-site as well as ensuring that a great finish can be achieved in every casing installation.

- Significantly quicker to fit than site made boxing
- Large stocks available for next day delivery
- For use with horizontal and vertical pipe work
- Guaranteed for 2 year guarantee as standard
- Pre-finished in white melamine – no additional decoration required

Don't just box it **n-case** it.
