

Gypra (GRG) Column Casings

The n-case Gypra casings are designed solely for interior use. Manufactured from glass reinforced gypsum, Gypra casings provide an excellent blend of simple installation, strength and versatility as well as fire resistance.

Where a smooth finish is required for on-site painting, Gypra casings provide a perfect solution, whether they are part of our standard range or custom made to meet individual project requirements.

An integral brushed aluminium or stainless steel skirting collar option is available to give increased protection, durability and wear resistance.

Material thickness: 4mm

Standard length: 4000mm.

Longer lengths can be achieved using an inner collar to link two column casings together

Finishes: Plain for onsite decoration
